Feed Every Shiba

$FES

<u>What is Feed Every Shiba?</u>

$FES was designed by experienced programmers, crypto investors and marketers that all have experience in the BSC DeFi space.

$FES combines utility and the power of a community, aims to be a top 100 crypto project, and plans to kickstart the next crypto revolution.

FeedEveryShiba is a memecoin dedicated to the legacy and promotion of Elon's Shiba. Our goal is to bring awareness and hype to the token by combining the best facets of our dev team.
We aim to have a fully functional payments protocol within a few weeks of launch - Namely FES protocol.
We also will eventually pair LP to each Floki and Shiba so that when they pump we pump!

Tokenomics and Supply

$Liquidity + Marketing

- 7% Liquidity
- 6% Marketing

Supply

- 1,000,000,000,000,000 $FES
